PROFILE

Hello, my name is Nina. I'm 23 years old and I live in Shelby Township. I graduated from high school in 2015 and from college in 2020 with a BA in graphic design. I have a lot of experience with working for busy and fast paced companies. I've been awarded employee of the month and achieved a couple scholarships. I'm a hard worker and love working around other employees. I'm always willing to lend a hand and I'm not afraid to ask for help. I love being creative and putting my best work forward. Lastly, I'm friendly and love working with customers to make sure that outstanding customer service is my number one priority. If you have any more questions about me feel free to use my contact information below.

Rochester, MI
B.A. in Graphic Design
Honors: *Summa Cum Laude* (3.8 GPA)

WORK EXPERIENCE

Target: Soft Lines

August 2015–September 2016

I was answering phone calls for customers that needed to speak to a specific department in the store. Also, it was my responsibility to keep the dressing room organized while making sure that clothes were hung up in the right spot on the soft lines floor. Lastly, very frequently I was a back-up cashier for the store. I was able to sell a target "Red Card" to a customer by being very informative on the benefits that the customer will gain by signing up for one.

Kroger: Dairy Department

July 13th, 2017–June 4th, 2018

I stocked the dairy department isles and mostly worked by myself to get stock off the truck and on the shelves. My biggest take away from this job was learning to organize my time efficiently and effectively to make sure that all of the products were stocked while also keeping the department racked nicely before the end of my shift.

McDonalds: Crew Member

August 8th, 2018– July 27th, 2020

I was hired in the grill area (cooking and preparing food), but I also learned service (taking orders and handing out food) through-out my time working here. I worked fast and efficiently to get food made and out to customers within minutes. Working together with my co-worker is important and it makes the job fun. I've been given college reimbursement for having a consistent and virtuous work ethic.

Helix Diagnostics: Data Entry/Processing

July 29th, 2020– July 15, 2021

Started off in data entry by inputting patient insurance and personal information before processing samples are able to be tested in the lab. I am fast and efficient when it comes to working on computers which helps with processing more specimen samples at a time.
